## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group II, claims 23-28 in Paper No. 7 is acknowledged. Claims 1-22 are withdrawn from consideration.

### ***Specification***

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities: it should be noted that page 13 of the specification is blank. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 27 and 28 provides for the use of super-oxygenated water, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 27 and 28 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App.

Art Unit: 1714

1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Zelenak (US 5,814,222).

Zelenak teaches super-oxygenated water containing 40-50 mg/l of oxygen (see col. 3, lines 22-20). The water is used in medicinal solutions such as organ transplant storage media and contact lens treating solution (saline) (see col. 3, lines 31-41).

Accordingly, Zelenak teaching all the material limitations of the claims, anticipates the claims.

Claims 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffman (US 5,747,079).

Hoffman teaches super-oxygenated beverages containing from 20-1000 mg/l of dissolved oxygen. Hoffman teaches super-oxygenated mouthwashes (see col. 2, lines 44-65).

Accordingly, Hoffman teaching all the material limitations of the claims, anticipates the claims.

Art Unit: 1714

Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by OXY-WATER.

OXY-WATER is taught to contain 34 mg/l of dissolved oxygen (see testimonials-medical statements)

Accordingly, OXY-WATER teaching all the material limitations of the claim, anticipates the claim.
